Education

NMIMS University

B.Tech in Computer Engineering | CGPA: 2.82/4.00

Aug 2023 - Present

Shirpur, Maharashtra

Madhyamik Vidyalaya Jr. College

12th | Percentage 83.67

Jul 2019 - May 2021

Parola, Maharashtra

Technical Skills

Languages: Python, C++, JavaScript, SQL, HTML/CSS

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Power BI, Google Colab, AWS

Frameworks and Libraries: React.js, Node.js, Flask, FastAPI, Pandas, NumPy, Matplotlib, Seaborn, LangChain

Databases: MySQL, SQLite, PostgreSQL

EXPERIENCE

Data Science Intern

March 2026- April 2026

Future Intern

Remote

- Analyzed sales data using Python, SQL, Pandas, Matplotlib, and Seaborn to identify business trends and performance metrics.
- Conducted customer retention and churn analysis to uncover behavioral patterns and data-driven decision making.
- Evaluated marketing funnel and conversion performance through data analytics and visualization.

Projects

Datalyst | Python, FastAPI, React.js, SQLite, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Gemini API

- Developed an AI-powered analytics platform with automated data preprocessing, visualization, forecasting, and insight generation.
- Built a no-code ML Studio for model training, evaluation, and comparison using Scikit-learn.
- Integrated a Gemini-powered chatbot for natural-language data exploration and interactive analytics.

Parkify | Python, Flask, SQLAlchemy, SQLite, PostgreSQL, HTML, CSS, JavaScript, Razorpay, RFID

- Developed a smart parking system with slot booking, RFID-based entry/exit, automated billing, and parking history tracking.
- Implemented user and admin authentication, digital wallet management, Razorpay-powered wallet top-ups, transaction history, and RESTful APIs using Flask and SQLAlchemy.
- Designed RESTful APIs and database schemas for parking operations, wallet transactions, and payment processing.

AI Teaching Assistant (RAG) | Python, FastAPI, LangChain, FAISS, OpenAI API, React

- Built a RAG-based AI assistant to answer questions from course materials and PDFs.
- Used FAISS vector database and embeddings for efficient semantic search and information retrieval.
- Integrated OpenAI API with LangChain to generate accurate, context-aware responses through a chat interface.

Position of Responsibility

Google Developer's Students Club

Aug 2023 – June 2024

Public Relations Core Member

NMIMS, Shirpur

- Coordinated event promotions and student outreach initiatives to increase participation in technical events.
- Managed sponsor outreach, partnerships, and stakeholder communication for workshops, hackathons, and club activities.
- Assisted in organizing technical events and workshops, enhancing the club's visibility across campus.

Achievements and Certifications

2026: Python for Data Science (IBM SkillsBuild)

2025: Oracle Cloud Infrastructure AI Foundations Associate (Oracle)

2026: Tata GenAI Powered Data Analytics Job Simulation (Tata)

2025: Complete Python Bootcamp (Code With Harry)

2024: Special Mention – Narsee Monjee Model United Nations

2023: Completed 21 Days of Community Service at an Orphanage
